**DETAILED ACTION*****Drawings***

Figure s 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Sorrells et al., U.S. 5,996,726.

Regarding claim 1, Sorrells et al. discloses a providing a prior location probability distribution associated with a first position of the device (fracture movement) in the borehole (col. 5, lines 58-61), providing a measurement of a putative distance moved by the device (col. 6, lines 11-25), and calculating a posterior location probability distribution associated with the subsequent position(col. 6, lines 34-45), the posterior location probability distribution being conditional on the prior location probability distribution.

Art Unit: 3672

As to claim 3, Sorrells et al. discloses a hydrocarbon well (col. 1, lines 7-10).

As to claim 12, Sorrells et al. discloses a computer system (20,24).

***Allowable Subject Matter***

Claims 2, 4-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose or suggest all the claimed subject matter including the posterior location probability distribution becoming the prior location probability distribution.

The prior art of record does not disclose or suggest all the claimed subject matter including the device being a logging tool.

The prior art of record does not disclose or suggest all the claimed subject matter including the device being a drill string bottom hole assembly.

The prior art of record does not disclose or suggest all the claimed subject matter including measuring the putative distance moved.

The prior art of record does not disclose or suggest all the claimed subject matter including indication whether the device is adjacent a casing collar.

The prior art of record does not disclose or suggest all the claimed subject matter including gamma-ray emission measurement.

The prior art of record does not disclose or suggest all the claimed subject matter including the representation of probability distribution resulting from at least one measurement is not zero-mean Gaussian.

Art Unit: 3672
